Outline

- The focus of the new ITS Project
- The role of the PC Representatives
- The Role of the Country Experts
- The new Technical Expert Groups (TEGs)
- The Role of the TEGs
- Procedures for selecting Training Participants
- Co-ordination, Communication & Investment
Focus of the New INOGATE Technical Secretariat Project

- The new ITS project is results-oriented
- Focus is on creating favourable investment climate
- The project is viewed in terms of the impact it will have on improving the well-being of citizens by:
  - Improving energy market convergence;
  - Improving energy security;
  - Promoting sustainable energy development;
  - Investment attraction in energy

Presentation of Component A
Project Indicators

Partner Countries Legislation and Standards

New ITS Component B

Primary Legislation Proposed
Secondary Legislation Proposed
Tertiary Legislation Proposed
Standards/Codes Proposed

Legislation and Standards approximated & harmonized with EU ones and adopted
Project Indicators

Fossil Energy Production

New ITS Component C

Number of EE/RES Investments

Foreign Direct Investments

€ Invested

New Jobs

Fossil Energy Intensity Decreased
Project Indicators

Gaps in data collection and compiling energy balances

Methodologies for Energy Data Collection
Reports Received From Data Providers
Energy Consumption Surveys Conducted
Software for energy balances compilation

Convergence of standards and methodologies for energy statistics

New ITS Component D
The Role of the Partner Country Representatives

- Country Co-ordinator (CC) is the key person operating in between the PC and the project.

- CC/WG Members/Regulatory Representatives help steer the project:
  - Set the tone for cooperation;
  - Represents stakeholders not present in the WG meetings;
  - In conjunction with the CCs, help advise the Project Team.

Presentation of Component A
Co-ordination

✓ ITS as conduit of information flows:
  ➢ EC to/from PCs
  ➢ PCs to/from PCs
  ➢ Project activities and events to/from PC stakeholders and donor organisations
  ➢ INOGATE projects (ESIB, CoMoEast)
  ➢ Project activities to the citizens
Communication

- **Vision** – what do we want at the end of the project?
- INOGATE to be seen as having a **real and positive impact** on the lives of citizens

- Evidence based approach (questionnaire)
- A tailored approach for each PC
- New communication tools – webinars, social media etc.
Investments

✓ Creating **improved investment climate** in the Partner Countries is focus of new ITS project

✓ OECD Plan for sustainable energy development

✓ Identifying specific energy sector investment projects for the Partner Countries

✓ INOGATE Ministerial Conference

✓ Demand driven approach – to succeed, PCs must **own** this approach.
The Role of the Country Experts

- Reporting
- Monitoring
- Identification of local experts
- Status Report

- Support to marketing/communicating the ITS project in the Partner Countries
- Marketing of AHEF
- Support to ITS experts
- Participate in meetings – donor co-ordination
- Logistic coordination of ITS events
The new Technical Experts Groups (TEGs)

Purpose

- TEGs will support the CC / WGMs in the overall steering of the INOGATE Programme to maximise benefits in the PCs
- Strengthen ownership and results of the project activities
- TEGs as a contact point
The new Technical Experts Groups (TEGs)

Subject Areas for TEGs

- TEGs to be created in areas such as standardisation and codes; energy markets and infrastructure, statistics, sustainable energy and investment facilitation.

TEG Composition

- Typically, mid-level officers of key stakeholder organisations - the so-called ‘coal-face workers’.
The Role of the Technical Experts Groups (TEGs)

Example of Standards and Codes TEG

✓ Act as a contact point for standards between the Partner Country and the INOGATE Programme;

✓ Facilitate the creation of the Technical Committees or enhancement of the existing Technical Committees through constructive dialogue among relevant stakeholders;

✓ Facilitate an adoption and use of the European electricity and gas standards;

Presentation of Component A
The Role of the Technical Experts Groups (TEGs)

- Assist in the preparation and monitoring of the implementation of the Harmonisation Road Maps and Action Plans for each country;

- Participate in the relevant meetings, seminars and study tours organised by the INOGATE project.
The Procedures for Selecting Participants for Training

- Effective training that leads to **real results** requires the right participants to be nominated
- The project team will develop **selection criteria** for all future trainings
- **Selection criteria** will set out the profile of those participants most likely to benefit;
  - Ownership, relevance, qualifications, continuity, sustainability, dissemination and follow-up
Thank you for attention!
