

INOGATE is a regional energy cooperation programme between the European Union and 11 Partner Countries in Eastern Europe, Caucasus and Central Asia

## INOGATE Newsletter

July 2015

### About this issue

INOGATE is helping Partner Countries integrate more fully into the European Energy Community, and at the same time paving the way for greater sustainability through improved energy efficiency and greater use of renewable energy sources. Over the past month, INOGATE held a series of workshops, seminars and meetings to increase regional cooperation in the energy sector for trading purposes, introduce software to forecast use of wind and solar energy and help prepare transposition of EU Directives in the oil and gas sectors. Energy policy planning was also given a boost by the emphasis on generating robust energy statistics and Sustainable Energy Week was celebrated in Georgia, both by the signing of a Memorandum of Understanding for a SE information centre and a seminar on how to touch the public imagination for increased energy efficiency. The next issue of INOGATE newsletter will be circulated in September.
