

INOGATE Newsletter

June 2015

About this issue

Welcome to the INOGATE e-newsletter!

Sustainable energy has been a major theme for this month's activities. Sustainable Energy Week in Ireland coincided with the Dublin INOGATE study tour on developing sustainable energy information centres and Moldova signed an MoU with INOGATE for a future sustainable energy centre. Energy efficiency is also a major topic in Azerbaijan for district heating upgrades, and in Moldova for support of its uptake of energy performance contracting. Energy statistics have also been high on the agenda in helping Kyrgyzstan prepare its first energy balance.

This month, INOGATE issued two new publications – its [Multi-Annual Report for 2012-2014, which contains plans for 2015-2016](#) and a major [Review of Energy Tariffs in INOGATE Partner Countries](#)

The INOGATE e-newsletter is issued monthly and we encourage you to forward this newsletter to colleagues to [subscribe](#). Your feedback on making this newsletter as useful as possible is very welcome!

IN THE SPOTLIGHT

Kyrgyzstan working towards creating its first energy balance

Kyrgyzstan is well on its way to creating its first energy balances, in both short-term and long-term scenarios. Energy is an essential part of day-to-day services, and is fundamental for country's socio-economic development. In the complex process of delivering energy to consumers, reliable and high quality energy statistics plays a critical role. Energy statistics is in the spotlight...

Improving district heating in Azerbaijan – a five-year plan

With the support of INOGATE technical assistance in the form of an AHEF (Ad Hoc Expert Facility), Azerbaijan is embarking on a five-year plan to upgrade and expand its district heating system. Moving towards a decentralised heating system, serving 8 to 12 apartment blocks, it will reduce capital...[Read more](#)

Improving energy performance contracting (EPC) in Moldova’s public and private sectors

The development of model contracts and removal of regulatory and non-regulatory barriers that impede the uptake of EPC help Moldova not only to contribute to the achievement of the country's EE targets, but also fulfil its future obligations under the Energy Community Treaty.

Energy Service...[Read more](#)

Moldova signs MoU on a Sustainable Energy Information Centre

The Director of the Energy Efficiency Agency of Moldova, Mr Mihail Stratan has signed a Memorandum of Understanding with the INOGATE Technical Secretariat, represented by its Team Leader, Mr Adrian Twomey. This mutual agreement is the first step in cooperation towards establishing a sustainable...[Read more](#)

Introducing energy performance certificates in the Armenian building sector

Armenia is taking the first steps towards energy certification within its building sector by developing a road map for a legal framework and distribution of its institutional roles. Currently, increasing energy efficiency (EE) in buildings is being supported in Armenia by the Global...[Read more](#)

Laying the groundwork for new connections to electricity and gas networks in Kyrgyzstan

Kyrgyzstan welcomed the INOGATE ITS to address the technical conditions and cost recovery mechanisms required to remove any ambiguity on the rules and obligations of stakeholders on new connections to electricity and gas distribution. INOGATE carried out a mission to collect information,...[Read more](#)
