

REPORT on ITS participation in UNIDO ISO 50001 Seminar

Date: October 19, 2012

Venue: Institute of Energy Savings and Energy Managers

Participants: UNIDO, GEF, GIZ, Ministry of Energy and Coal Industry (MinEnergy), State Agency for Energy Efficiency (SAEE), business community, NGOs (Association of Energy Engineers of Ukraine, Ukrainian Association of Industrialists and Entrepreneurs /UAIE/), banks and universities – total 22.

ITS: Dmitry Strokon, Vladimir Ternytskyi

Main Findings:

- UNIDO is going to launch a project on Standard ISO 50001 “Energy Management Systems” in Ukraine. The International organization is currently finalizing the scope of work;
- Dmitry Strokon presented the INOGATE Programme, INOGATE Technical Secretariat, some results of the SEMISE Project and the new ITS Project, information about the ITS AHEF was disseminated;
- In discussions it was stated that though the project is not launched there are many areas for cooperation with the ITS;
- GIZ is implementing this EnMS Standard at a number of enterprises in Donetsk Region. And the group of energy managers is going to Germany on a study tour to a couple of sites in different industries;
- 2 representatives of business community praised the INOGATE/SEMISE seminar on the EnMS Standard as the one that had given a sound and deep insight into the Standard;
- Banks are not ready to financially support the introduction of ISO 50001 on the ground that it is not an EE/RES project. Provided the banks are taught to apply the International Performance Measurement and Verification Protocol to such proposals, they could consider financing it;
- The EU Project “Capacity Building to State Agency on Energy Efficiency and Energy Saving of Ukraine (SAEE)” applied for the ITS’s support in providing a moderator and a speaker at the IV International Investment Business Forum on EE and RES in Ukraine in November 2012. The ITS offered 2 candidates for these positions:
 - Mr. Eugeny Nikitin (EE Committee Head, UAIE, bilingual);
 - Mr. Jozef Herzl (ex-SEMISE Team Leader, bilingual);
- Taken into account that INOGATE conducted a successful seminar on ISO 50001 last year and is going to work on in the same area, UNIDO suggests a meeting during the inception visit of the UNIDO experts preliminary in November-December 2012 (agreed with UNIDO representative);
- The Institute of Energy Savings and Energy Managers has developed a number of computer games (e.g. puzzles) on Energy Savings for school pupils. These games needs adaption into Russian should the ITS use them for awareness raising the Component C is planning to conduct;
- In the discussion with the EU Project “Capacity Building to State Agency on Energy Efficiency and Energy Saving of Ukraine (SAEE)” Ms. Natalya Klimenko-Rampias requested some ideas the ITS had previously discussed with Mr. Inshekov (January-February 2012) to incorporate them into the work plan if applicable.

Actions to be taken:

- Forward to Ms. Natalya Klimenko-Rampias the ideas;
- Inform Component C (Larry Good and Vahan Babajanyan) about the meeting as soon as the UNIDO determines the dates of the inception visit to Kiev, UA;
- Arrange a meeting with the Institute to see the awareness material for possible use in ITS awareness raising campaigns when Component C is in Kiev.
